MEMORANDUM

From: Associate Scientific Director
To: Management Engineer

RADIOACTIVE SAMPLES, disposed

Subj: Air Raid Shelters Now Assigned to NRDL

1. The two (2) cells of Building 142 are considered absolutely essential to the prosecution of Operation GREENHOUSE Project 6.5 since no space with comparable shielding for high level counting is available at present insofar as is known.
2. No scientific value is attached to the samples stored in Building 224; however, should this material be removed from its present location, it is suggested that NRDL monitors survey the samples prior to removal.
3. No fissionable material is located in the sections of Buildings 142 and 224 under NRDL cognizance.

Paul C. Tompkins/R.P.N.
